EXPLANATION OF MEMBERSHIP CATEGORY TYPE

Master Member (MM): Larger organizations who manage corporately, by franchise or through banner programs, multiple shops with bays. MMs are responsible for inputting shop accreditation information into the MAPC database. Dues are based on sales plus per bay assessment on accredited bays.
Examples of Master Member: Active Green + Ross, CARQUEST, Certigard, NAPA, Uni-Select.

Facility (MM-F): Shops affiliated with a MM may apply for accreditation through their MM and pay only the accreditation fee. They save the cost of basic membership. All accreditation materials are distributed through the MM to the accredited facility.

Basic Member (BM): Independent shop owners or those who choose to participate without the support of a MM. Membership dues are based on sales volume, plus a \$30 per bay assessment. Accreditation fees at \$150 per shop also apply. BMs who choose to accredit multiple shops under this category must base their dues on the total annual sales for all stores.

Trade Association (TA): Not for profit industry associations representing a number of independent shops. MAPC provides UICSS on CD in Word and PDF format as part of the inventory of accreditation materials.
Examples of Trade Association Member: Barrie Area Automotive Repair Assn, Grey Bruce Automotive Repair Association, Canadian Independent Automotive Association.

Facility (TA-F): Shops affiliated with a TA may apply for accreditation through their TA, and pay only the accreditation fee and per bay assessment (+ GST). They save the cost of basic membership. All accreditation materials are distributed through the TA to the accredited facility.

Regular Member (RM): Organizations join under the regular member category, allowing them use of the Uniform Inspection and Communication Standards (UICS) as a value added component of their products.
Examples of Regular Member: Federal-Mogul

Associate Member (AM): Organizations or associations associated with the automotive repair industry and are supportive of MAPC's goals, but do not have shops or commercial use for the Standards. Other organizations that fall under the AM category include: manufacturer representatives, trade press, consultant, law firm, and automotive education.
Examples of Associate Member: AIA, CARS

Sponsor (S): Organizations that support the goals of the Motorist Assurance Program of Canada can contribute financially to ensuring the Program's development and success through sponsorship.
